EDUCATION

Hoërskool Randburg

Jan 2011 - Dec 2015

National Senior Certificate with minimum requirements for Bachelor's degree.

SKILLS & INTERESTS

Languages: C#, SQL, HTML, CSS, JavaScript, PHP, Swift, Objective-C, Delphi

Interests: Climbing, Cycling, Calisthenics, Investing

I am an energetic person with a healthy and active lifestyle. My adaptable nature allows me to fit in easily. I am a driven person who enjoys challenges and learning new skills.

Key Skills

- Web development
- App development

Work Experience

2018 - present

Software Developer at [Synchrony](#)

I have work on various projects amongst others;

- [BoardCloud](#) (Rebuild of an existing concept with multi tenant usage), [Compozr](#) (Proof of concept for BoardCloud)
- [The Pharma World](#) (Real time glucose monitoring), Ocean Basket (Sql data collation for reporting), [Wildlife College](#) (Xamarin multi game platform)

2017 - 2018

IT Support Technician at [NetCad](#)

I was mainly on the helpdesk and onsite to assist clients with technical issues.

- I built a tool to fetch all clients and server backup reports to assist technicians with their proactive tasks. This increases workflow and reduces the amount of hours spent on certain tasks.
- I started building a portal for the tools I was writing for the company.
- I wrote scripts and tools with their software to assist in managing clients, server backups and logs.

2016 - 2017

IT Support Technician at [OMSA Connect](#)

First job out of school.

- Admin work, drove around fetching products and assisting clients with tech issues.
- Patching cables and putting together networks for clients, security cameras, boardroom telephone setups, etc.

Other Experience

2017 - 2019

I built a crawler that would find IPTV and VOD streaming links and filter out broken streams. Generated playlists with the links and hosted them for public usage.

2013 - 2016

School was teaching Scratch and Delphi. I started learning Swift in 2014, built and later published two apps on Apple's store for a year.

- Rewrote the bandwidth speed test in Swift.
- Built a simple weather app in Swift with 7 day details and other forms of data I could surface from API's.

2010 - 2013

I started teaching myself because I didn't want to wait for school to. I was mainly learning HTML, CSS, JavaScript and Regex. I was also making chrome extensions for fun.

- Syntax highlighter

- Bandwidth/Speed tester (canvas development: graphs, charts and a custom speedometer)

Education

2010 - 2015

Hoërskool Randburg

National Senior Certificate with minimum requirements for Bachelor's degree

Hobbies

Rock climbing, cycling, calisthenics, dancing,
